

PICOTE SMART SPIDER

Safe but Effective for Descaling Damaged Pipes

The Smart Spider is a highly efficient tool for descaling pipes which are damaged, where the bottom section is missing or where there are holes in the pipe.

Drain cleaning professionals often run into situations where typical chain tools or abrasive cleaning methods can do more harm than good. The Smart Spider provides a safe yet highly effective cleaning solution.

The Smart Spider pulverizes scale into a fine dust, making it easy to flush with water, without causing any blockages further down the line.

Models for the Midi, Super Midi, Maxi, & Maxi Power+ Millers, as well as robotic cutters.

USES AND BENEFITS

- The Smart Spider cleans all types of pipes fast and highly efficiently - it is even safe to use in PVC pipes.
- A unique tool designed specifically for pipes where the bottom or other sections of the pipe are missing.
- Great at removing fats, oil, and grease (FOG) from pipes.
- Easily rebuilt with affordable spare parts and rebuild packages.
- Can be used to prepare a damaged or fragile pipe for lining or coating.
- Easily navigates 90° bends.
