

## CYCLONE CHAINS

*Accurately Hone Pipes Back to Near Original Condition*

PVC

Standard

Tiger

Premium

Tornado

The Cyclone Chains are a great option for finish cleaning because they accurately hone the pipe back to near original condition.

The Cyclone Chains utilize centrifugal force to keep them centered inside the pipe which also provides extra protection for descaling cracked or damaged pipes.

The Cyclone chains are available in 5 versions: PVC, Standard, Tiger, Premium, and Tornado.

## USES AND BENEFITS

Available in 5 versions:

- **PVC:** foregoes carbide teeth, which makes it less aggressive and able to clean inside more fragile plastic and clay pipes.
- **Standard:** has carbide teeth that quickly clean the pipe – a great general purpose option.
- **Tiger:** A gentle, lightweight option for cleaning cast iron pipes, with extra-hard, long lasting carbide teeth.
- **Premium:** features twice the carbide and surface contact area of the standard version, so they clean even faster and last longer since the carbide sees less wear per job.
- **Tornado:** for use exclusively with the Maxi Power+. Features special, highly aggressive teeth for descaling, concrete removal, heavy tuberculate and debris in larger diameter pipes.

### Technical Specifications

Versions	Standard
	Premium
	PVC
	Tornado
Shaft Sizes	8mm (1/3")
	10mm (3/8")
	12mm (1/2")
	18mm (3/4")
Pipe Sizes	DN70-300 (3-12")
